# Introduction

The seal and signature of the U.S. Department of Homeland Security were created to embody our mission and values.

As the public representation of our department, it must be reproduced with care and precision. Consistent reproduction across all types of applications—print materials, presentations, advertisements, websites, signage and even stationery—will reinforce our mission and result in a greater awareness of the Department of Homeland Security.

This manual explains the elements of the seal, the signature and the basic specifications for reproduction, including color specifications and size requirements. Examples of distortions and misuses to avoid have also been included. Please make use of these guidelines and the approved digital artwork when reproducing the Homeland Security seal and signature.

Any questions regarding the use or application of the Homeland Security seal and signature should be directed to:

Office of Public Affairs  
U.S. Department of Homeland Security  
202 282 8013 tel

# Seal and Signature

The Homeland Security signature is made up of two elements—the seal and the wordmark.

## **The Seal:**

A graphically styled white American eagle appears in a circular blue field. The eagle's outstretched wings break through an inner red ring into an outer white ring that contains a circular placement of the words "U.S. DEPARTMENT OF" in the top half and "HOMELAND SECURITY" in the bottom half. The outer white ring has a silvery gray border. As in The Great Seal, the eagle's left claw holds an olive branch with 13 leaves and 13 seeds while the right claw grasps 13 arrows.

Centered on the eagle's breast is a shield divided into three sections containing elements that represent the homeland "from sea to shining sea." The top element, a dark blue sky, contains 22 stars representing

the original 22 agencies and bureaus that have come together to form the department. The left shield element contains white mountains behind a green plain underneath a light blue sky. The right shield element contains four wave shapes representing the oceans, lakes and waterways alternating light and dark blue separated by white lines.

## **The Wordmark:**

The words "Homeland Security" are placed to the right of the seal and set in upper- and lowercase letters. The words have been set in the Monotype version of the font Joanna. Each letter has been carefully drawn and placed. Use only the approved digital artwork files and never typeset, recreate or alter the seal or signature. Any change will cause inconsistencies, lessening the impact and compromising the trust of the Homeland Security seal and signature.

Homeland Security Signature: Preferred Configuration

Seal

Homeland  
Security

Wordmark

# Seal and Signature Variations

The preferred signature lockup shown previously should be used in all applications whenever possible. If there is insufficient horizontal space, an alternate lockup that is vertically oriented can be used. In this lockup, the wordmark is centered underneath the seal, as shown in the exhibit below.

The alternate signature lockup should be used only when the preferred lockup cannot be reproduced accurately.

Use of the seal alone is reserved for special instances such as lapel pins or podium signs.

As with the preferred version of the signature, always use the approved digital artwork.

Vertical Signature

Seal Alone

# Clearspace and Minimum Size

To ensure the prominence and legibility of the Homeland Security signature, always surround it with a minimum amount of clearspace. This clearspace isolates the signature from competing graphic elements, such as text, photography or background patterns, that may divert attention from the signature. As shown in the exhibit below, the clearspace for the signature is equal to the height of the uppercase letter “H” in the word “Homeland” in the size at which the signature is reproduced.

The Homeland Security signature can be used in a wide variety of sizes, but when it is sized too small, legibility is reduced and its impact is diminished. The minimum size is determined by the diameter of the seal. In printed material, the signature should not be reproduced with the seal smaller than .625" in diameter.

# Primary Color Palette

The Homeland Security signature should be reproduced in full color—Homeland Security Blue, Gray, Green, Light Blue, and Red—whenever possible. These colors are equivalent to the PANTONE numbers listed in the table below. For 4-color process printing, refer to the CMYK values shown. For on-screen applications (video, broadcast), refer to the RGB Video values specified. For Web applications, refer to the RGB Web values.

The PANTONE and CMYK values provided can be used on both coated and uncoated paper when printing. Although variations in color will occur, try to match the colors as closely as possible.

The colors shown throughout this manual have not been evaluated by Pantone, Inc., for accuracy and may not match the PANTONE® Color Standards. Please refer to the current edition of the Pantone color formula guide. PANTONE® is a registered trademark of Pantone, Inc.

	Pantone®	C	M	Y	K	R	G	B	R	G	B
						Video			Web		
Homeland Security Blue	2955 C	100	45	0	37	0	47	128	0	51	102
Homeland Security Gray	Cool Gray 6 C	0	0	0	28	176	177	179	153	153	153
Homeland Security Red	187 C	0	100	79	20	165	0	33	204	0	51
Homeland Security Light Blue	307 C	100	16	0	27	0	112	178	0	102	153
Homeland Security Green	370 C	56	0	100	27	89	134	0	51	153	0

# Typography

Typography plays a major role in shaping a brand. To help create a consistent look and feel for all Homeland Security communications, one typeface—Joanna MT—is preferred. This typeface has been chosen to complement the look of the Homeland Security wordmark.

When Joanna MT is not available on your computer, you may substitute Times New Roman for Joanna MT.

# Homeland Security Signature Color Variations

The preferred version of the Homeland Security signature is the full-color positive signature. This version should be used for all applications whenever possible. Signature artwork is available in spot color (PANTONE), 4-color process (CMYK) and RGB Video and RGB Web versions. These color variations also apply to the alternate signature.

If reproduction is limited to one color, signatures in Homeland Security Blue with a tint and black with a tint are available. When the signature is placed on a dark background color or photograph, use the reverse versions of the signature.

# Background Control

White is the most effective background on which to reproduce the full-color Homeland Security signature because it provides the colors with a clean, crisp contrast. The reverse version of the full-color signature can also be used with Homeland Security Blue and a 75% tint of black as background colors.

If the full-color signature appears on light backgrounds or photographs, there must always be sufficient contrast between the background or photograph and the signature colors. If the signature is being placed on a background or photograph where the full-color signature will be illegible, use one of the reverse signatures.

# Signature Misuses

Incorrect use of the Homeland Security signature can compromise its integrity and effectiveness. Shown below is a small and by no means comprehensive sample of possible misuses.

To ensure accurate and consistent reproduction of the signature, always use the approved digital artwork. Never alter, add to or recreate the Homeland Security signature.

Do not change the arrangement of the preferred signature lockup.

Do not change the arrangement of the alternate signature lockup.

Do not change the color of the wordmark or seal.

Do not re-typeset or outline the wordmark.

Do not place the seal within a shape.

Do not distort the seal or wordmark.

Do not use the full-color signature with the color background showing through the seal.

# Signature Naming Convention

Use this naming convention guide to select the appropriate electronic signature for reproduction. The file formats provided are explained below.

## EPS Format:

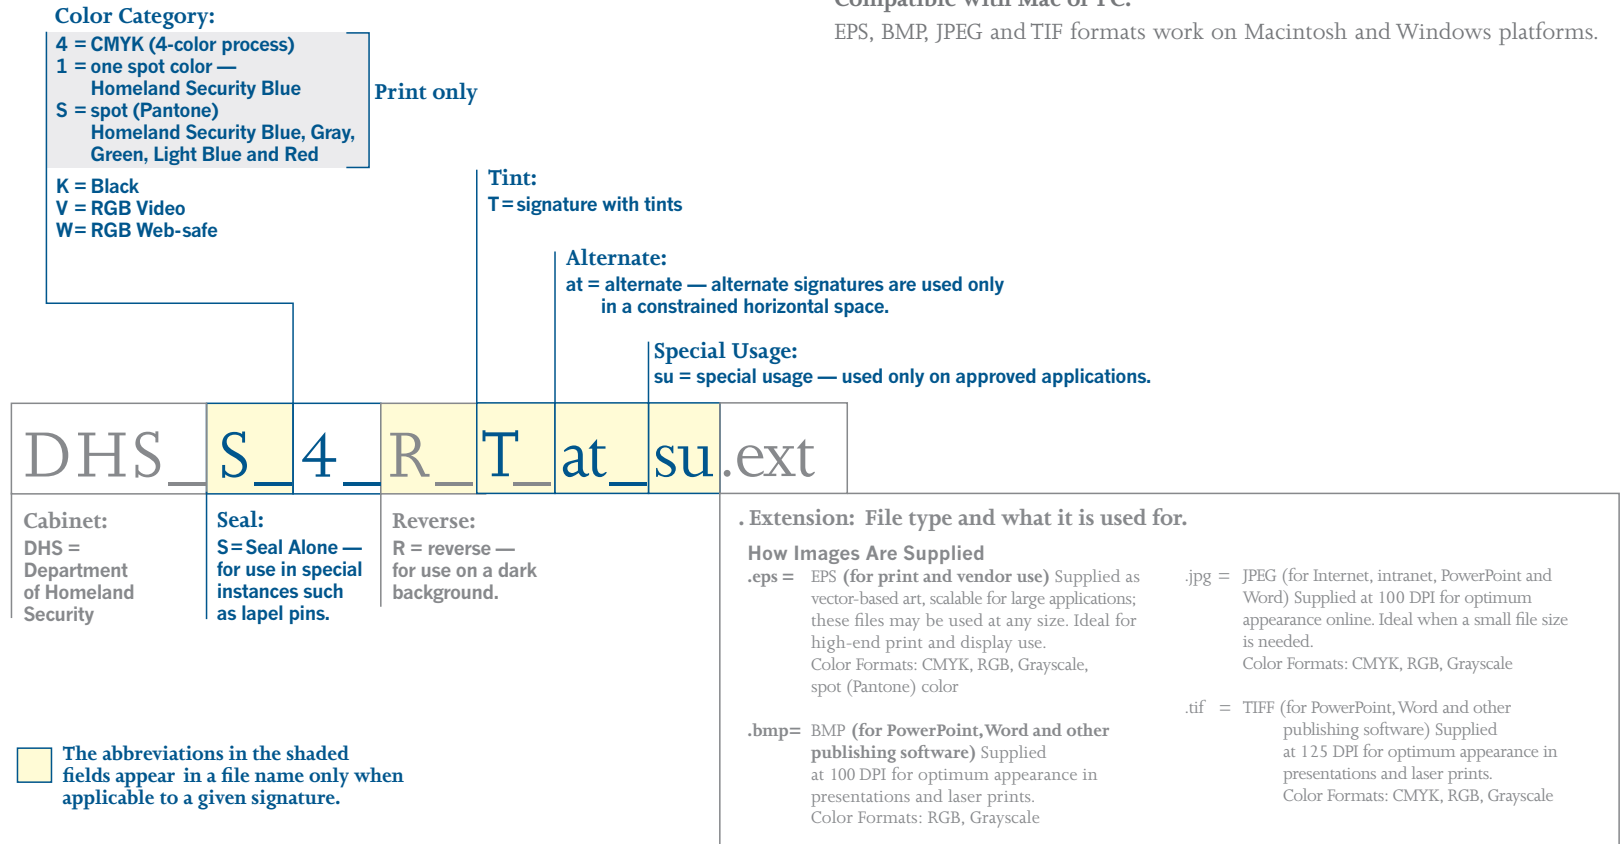

The EPS format is for applications that require high-resolution artwork for reproduction—for example, anything that is press-printed or for large-scale projects such as banners or signage. EPS signatures can be proportionally scaled (enlarged and reduced) without degradation in quality. EPS files can be imported into or opened by page layout and illustration software such as QuarkXPress, Illustrator or Photoshop.

## BMP, JPEG and TIF Formats:

BMP signatures are suitable for importing into applications such as Microsoft Word, Excel or Powerpoint. BMPs can be proportionally reduced but should only be slightly enlarged, otherwise distortion of the signature will occur. JPEGs have been created for use in web and Microsoft applications. JPEGs should never be proportionally enlarged beyond the size supplied as the quality will degrade quickly. TIF signatures are suitable for importing into applications such as Microsoft Word, Powerpoint and page layout programs. TIFs can be proportionally reduced but should only be slightly enlarged, otherwise distortion of the signature will occur.

## Compatible with Mac or PC:

EPS, BMP, JPEG and TIF formats work on Macintosh and Windows platforms.

# U.S. Department of Homeland Security Branding System

# U.S. Department of Homeland Security Branding System

## **The objectives of our branding system are to:**

- Focus and build impact for Homeland Security, reflecting a more modern and non-bureaucratic form of government.
- Strengthen and unify the department.
- Help state and local entities, as well as the general public, understand the role and the structure of the department.
- Simplify and streamline communication.

## **What makes a powerful branding system?**

- It must be clear from the user/customer perspective.
- Minimize the use of acronyms. An abundance of acronyms do not communicate clarity and directness.
- No more than two levels should be branded. Too many layers and too many symbols suggest an expected government bureaucracy and a disparate organization with lack of focus.
- Our branding system should not be viewed as an organizational chart.

# U.S. Department of Homeland Security Branding System

## Level IV — Programs, Locations and Centers

A program name should appear as the second line of address copy following “U.S. Department of Homeland Security.” It can also appear as a headline on a brochure, as a supporting message or as a primary message on a wayfinding sign. A program name should never be “locked up” to the Homeland Security identity.

A location should appear as the first line of address copy followed by “U.S. Department of Homeland Security.” Like a program name, it can also appear as a headline on a brochure, as a supporting message or as a primary message on a wayfinding sign.

## Signature Color Variations

The preferred version of the public facing entity FEMA Homeland Security signature is the full-color positive signature. This version should be used for all applications whenever possible. Signature artwork is available in spot color (PANTONE), 4-color process (CMYK) and RGB Video and RGB Web versions. These color variations also apply to the alternate signature.

If reproduction is limited to one color, signatures in Homeland Security Blue with a tint and black with a tint are available. When the signature is placed on a dark background color or photograph, use the reverse versions of the signature.

# Signature Naming Convention

Use this naming convention guide to select the appropriate electronic signature for reproduction. The file formats provided are explained below.

## EPS Format:

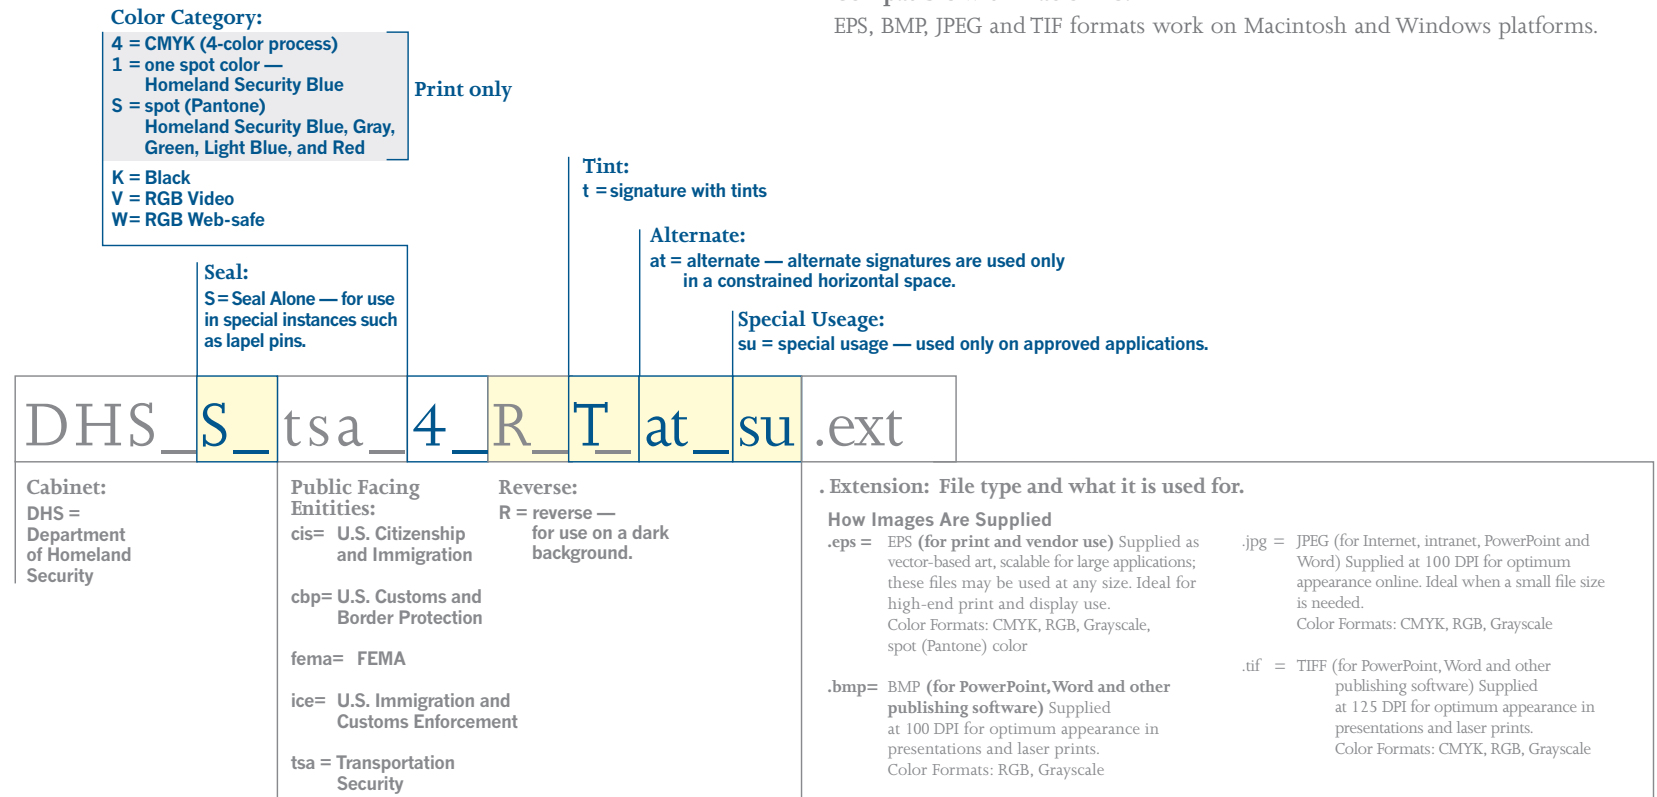

The EPS format is for applications that require high-resolution artwork for reproduction, for example, anything that is press-printed or for large-scale projects such as banners or signage. EPS signatures can be proportionally scaled (enlarged and reduced) without degradation in quality. EPS files can be imported into or opened by page layout and illustration software such as QuarkXPress, Illustrator or Photoshop.

## BMP, JPEG and TIF Formats:

BMP signatures are suitable for importing into applications such as Microsoft Word, Excel or Powerpoint. BMPs can be proportionally reduced but should only be slightly enlarged, otherwise distortion of the signature will occur. JPEGs have been created for use in web and Microsoft applications. JPEGs should never be proportionally enlarged beyond the size supplied as the quality will degrade quickly. TIF signatures are suitable for importing into applications such as Microsoft Word, Powerpoint and page layout programs. TIFs can be proportionally reduced but should only be slightly enlarged, otherwise distortion of the signature will occur.

## Compatible with Mac or PC:

EPS, BMP, JPEG and TIF formats work on Macintosh and Windows platforms.

The abbreviations in the shaded fields appear in a file name only when applicable to a given signature.
